## DETAILED ACTION

### *Drawings*

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the secondary cover in combination with the embodiment of Figure 2 (as claimed in claim 7), and the handle portions with a plurality of perpendicular side edges (as claimed in claims 1-3) must be shown or the feature(s) canceled from the claim(s). Currently Figure 2 only has a single cover, while the handle portions only show a single perpendicular edge. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1-3, when describing the handle portion, the claim presents the terminology "perpendicular side edges" in describing the handle portion, which implies a plurality of side edges. It is unclear as to how the handle portion may have two perpendicular edges and still enable passage into the handle portion. The examiner questions whether there is an additional seal forming the edge, an open slit, or no second edge at all. To prosecute the examination of the claim, the examiner assumes no second edge (i.e. only one perpendicular edge), as currently shown in figures 2 and 5.

Claim 5 is dependent on claim 2 and is rejected for the above reason.

Claims 4, 6, and 7 are dependent on claim 3 and are rejected for the above reason.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 3, 4, 6, and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Gelbard (US 4,943,167).

Claim 3: Gelbard discloses a bag (Figure 4) with a major body portion 23 in a generally rectangular configuration with a discontinuous side edge 24 and continuous side edge 25 having a linear top and bottom edges therebetween. Gelbard discloses a minor handle portion (two handle sides near discontinuous edge 24) with linear bottom and top edges and a perpendicular side edge 24. Gelbard is arranged as claimed and is capable of functioning as claimed.

Claim 4: Gelbard discloses pleat **21/22**.

Claim 6: Gelbard discloses the handle portion adjacent the discontinuous side edge 24.

Claim 7: Gelbard discloses manufacturing a plurality of the bags at once; therefore any additional bags located with any one particular bag constitutes a secondary cover. It is noted that the claim merely recites the existence of the secondary cover and does not interrelate the structures at all.

***Allowable Subject Matter***

4. Claims 1, 2, and 5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

5. As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

***Conclusion***

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
